ABOUT ONLINE TRAINING

Since 1987, Q-mation has provided certified training for AVEVA and Wonderware software products to over 12,000 students! With virtual training, you'll benefit from a live certified instructor and interactive lab exercises in real time. Course material will be presented in an open lecture format with ample time dedicated to answering any questions you may have to ensure the successful completion of each lab exercise.

HOW IT WORKS:

- Before the start date of your training course, you'll receive an email with setup instructions to connect to our virtual training portal. Our team will be available to assist you so that you're ready to go!

- You will also receive an invite to the online training portal, where you'll watch the instructor's presentations and live software demonstrations.

- Printed course materials will be provided to you before the start of your training course, so they'll be handy for reference and note-taking.

- Unless specified otherwise, each course day typically begins at 9 am and ends at 5 pm, with plenty of time allotted for breaks and lunch.

- Hardware you'll need: A PC or Mac connected to the internet. (TIP: *It's not a requirement, but if you have the ability to use dual monitors, you could work on your training app on one monitor while viewing the lecture on the other.*)

We look forward to providing you with an amazing learning experience!
